4. Frances' Engraved Seal

Frances would seal her letters with a blob of wax and press her name into while it was still warm. There are two images of Frances' name on her seal. Which is the correct one?

Image 1; Image 2 has been reversed. [In order for the seal to be read from left to right, the printing must go in the opposite direction.]

5. Siberian Model Boat

How many figures can you find in the lifeboats?

This is a trick question; there can be two different answers – 4 or 6. Image 5 shows two figures in one boat; Image 7 shows two figures in two boats each [Image 5 is a close-up of one of the boats in Image 7]. In total there are four figures in lifeboats but the way the question is worded, it doesn't negate the possibility of adding Image 5 and 7 together to total 6 figures.
